## AP ${ }^{\circledR}$ MACROECONOMICS 2010 SCORING GUIDELINES (Form B)

## Question 1

$\mathbf{1 0}$ Points $(2+2+2+2+2)$

(a) 2 points:

- One point is earned for a correctly labeled AD/AS graph with vertical LRAS at $Y_{F}$.
- One point is earned for showing equilibrium output and price level to the left of $Y_{F}$.
(b) 2 points:
- One point is earned for showing a rightward shift of the AD curve.
- One point is earned for showing the new equilibrium output and price level.

(c) 2 points:
- One point is earned for a correctly labeled graph of the short-run Phillips curve.
- One point is earned for correctly labeling points $A$ and $B$ on the SRPC that indicate a leftward movement along the SRPC.
(d) 2 points:
- One point is earned for stating that the real interest rate will rise.
- One point is earned for the explanation that government borrowing increases the demand for loanable funds.

## AP ${ }^{\circledR}$ MACROECONOMICS 2010 SCORING GUIDELINES (Form B)

## Question 1 (continued)

(e) 2 points:

- One point is earned for a correctly labeled production possibilities curve.
- One point is earned for labeling points $C$ and $D$, showing a movement toward the curve and an increase in military goods.

Write in the box the number of the question you are answering on this page as it is designated in the exam.

(b) (i) As shown, Aggregate Demand increases from $A D_{1}$ to $A D_{2}$
ii) As shown, both equilibrium price level and real output increase.
 rate increases from $P_{1}$ to $P_{2}$.
(d) The real interest rate will increase. Since the increased military spending is financed through government borrowing, the demand for Loanable funds in the loanable funds market increases. Hence, the demand curve for loanable funds shift to the right anal the real interest rate rises comespandingly.

IA 2 of 2
1 (e)
Write in the box the number of the question you are answering on this page as it is designated in the exam.
1 (e) since the question specifies cerentity of military Goods that the economy is producing at ca output less then the full-empleyment output level, the economy is initially at ports $C$, inside the PPC curve.

Since not all resources have been

eftriently employed in the production, the economy can thus increase the quantity of military goods without trade-off of civilian goods. Hence, the increased military expenditure is shown by upward movement from $C$ to $D$.

Write in the box the number of the question you are answering on this page as it is designated in the exam.

b, (i) Aggregate demand will increase because domestic military expenditures is a form of government spending
(ii) Labelled on Graph.

d, The real interest rate will increase because as the government borrows money, the money supply decreases and that makes the interest rates go higher (increase)

(b)

See graph above, the aggregate demand curve shift seightwored
(c)

(d)

The national debt is inisessed though government bousing. Thus depeeaciating the value of the cuvency of the country. The government would most (ally to sell birds to the open market to slablije the cuseney. Thus the interest rode will decease.

# AP ${ }^{\circledR}$ MACROECONOMICS <br> 2010 SCORING COMMENTARY (Form B) 

## Question 1

## Sample: 1A

Score: 10

The student earned all 10 points for this question.

## Sample: 1B

Score: 7

The student lost 1 point in part (d) for an incorrect explanation for the rise in the real interest rate. The student lost 2 points in part (e) because the PPC graph is not correctly labeled and the movement from point $C$ to point $D$ shows a shift in the curve.

## Sample: 1C

Score: 1

The student earned 1 point in part (b) for the rightward shift of the demand curve.
